

NSM *MIDNIGHT Sapphire*

NSM M.U.S.I.C.

NSM

After MIDNIGHT...

No other will perform as well. The Midnight Sapphire incorporates NSM's proven technology in a sleek cabinet design to provide operators an efficient, attractive jukebox suitable for any location.

Standard Features

- ◆ A wide view 16-jacket title display (a) that allows patrons to view all 100 selections within 5 seconds. The title display design offers easy loading and uses a standard-sized jacket and title card.
- ◆ The world's most protective CD handling and storage system (b). All CD's are "cradled" in individual trays and are not directly handled, eliminating the possibility of scratching. The compact, snap in/out magazines provide easy loading and transport.
- ◆ The world's fastest 100-CD single player changer (c), visible at the top of the jukebox's cabinet, provides more paid-for plays compressed into less time.
- ◆ Easy-to-access components (d) are located on the inside back wall of the jukebox's cabinet and include a 250-Watt per-channel amplifier, control & credit unit, and internal/external audio source/microphone adapter board. These components, along with the output transformer (located in the lower cabinet area of the jukebox), are easy to access as the jukebox's title display locks into place.
- ◆ 750-Note capacity bill acceptor and mechanical coin mechanism for U.S.; electronic coin mechanism for Canada.
- ◆ ES 5.1 technology with over 100 programmable features, including "Real Time" clock on/off controller with multiple time windows for attract mode, background music, and more.
- ◆ An easily exchangeable front graphics panel (e), located behind the lower front glass, that provides the opportunity to customize the jukebox to the location or seek advertising revenue from the jukebox.

Options & Accessories

Dimensions & Weight
