

100-CD HyperBeam Laser Disc Jukebox
Nostalgia Gold

The first *real* classic
since the first real classic.

NSM M.U.S.I.C.

We could've manufactured a replica jukebox. Instead, we crafted a classic.

The Nostalgia Gold

The classic look of the 40's, fitted with the classic sound system of the 90's ... the high technology 100-CD capacity HyperBeam laser disc system.

Few can come in its presence without taking pause. Fewer still can refrain from looking closer. And almost no one can resist wanting to hear it. After all, its special enchantment to the eye suggests that there must be a specialness to its sound as well.

And with its high performance HyperBeam sound system, no one — *absolutely no one* — will be disappointed. That specialness of sound is, indeed, there. Every bit as impressive as the cabinetry in which it's housed. Crystal clear highs. Thunderously powerful lows. Impeccably clean audio reproduction throughout the full audible range.

That is, in fact, the reason we regard Nostalgia Gold as the first real classic since the introduction of its predecessor from the golden age of jukeboxes — because it combines all the quality and beauty of the original, with all the sound dynamics and performance of pinnacle technology.

The Nostalgia Gold ...
The first *real* classic since
the first real classic.

True Classic Cabinetry

Thoroughly quality construction, both materials and craftsmanship. Meticulous attention to original design detail. And all the splendor of forever-changing color hues, almost mesmerizing bubble tubes, and the wizardry of a visible CD mechanism.

- Dual motor-driven, color-wash cylinders.
- Full 7/8" (22mm) thick cabinet construction. 12-layer cross-grained lamination.
- "Wild Ebony" Walnut shell, sealed (2 coats) and satin-gloss finished (2 coats).

- Solid cast metal alloy trim fittings and adornments (24). Polished, triple plated (copper, nickel & chrome), buffed to brilliant mirror finish.

- Solid "Wild Ebony" Walnut support knees (relief carved).

- 372 individual 1/2" (12.7mm) inlaid decorative mirror squares accent cabinet sides.
- Brilliantly polished, 5-step cast aluminum "Pedestal" base.
- "Angel Gold" metallic - weave, diamond grill cloth.
- 8 continuous flow, sealed bubble tubes.
- Translucent, soft-lens diffuser pilasters.
- 1 1/4" (32 mm) thick front door frame, select blonde "Fiddle Back" decorative veneer.

True Classic Sound System

A 100-CD capacity library, an ultra high-speed CD changing mechanism, powerful 250 Watt true RMS amplification, snap-in/snap-out CD magazines, and over 100 programmable functions. In sum, an exceptionally high performance, technologically advanced sound system ... the NSM HyperBeam System.

- "Pyle Power" Speaker system. 10" dual coil Pyle Driver II woofer, and two -6" Pyle Driver midranges.

- 250 Watt RMS amplifier.

- High efficiency, ultra compact electronics.

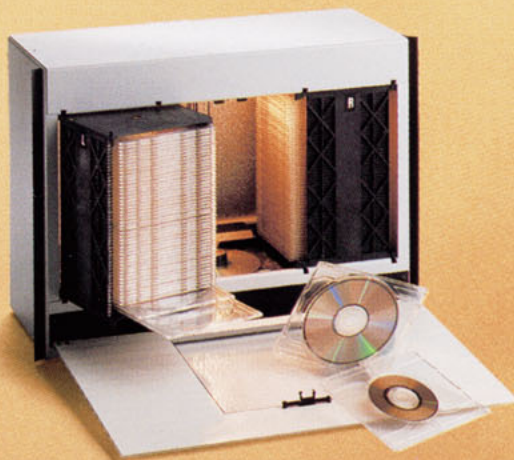

- 100 compact-disc-capacity storage library, two 50-CD snap-in/snap-out magazines, 100 individual CD trays for full-circumference CD support.

- A mechanism that never touches CDs, just the trays they're cradled in.

- Ultra high speed CD changer can find any selection on any CD in under 5 seconds average.

- Over 100 programmable functions, many controllable by internal "real time" clock ... automated background music, maximum song play length, song/CD lock out, single and full album play, periodic play-a-song (attract mode), pricing, self-diagnostics, much more.
