NSM M.U.S.I.C.

NSM GEMFIRE

Things are heating up with NSM's new GEMFIRE wall mount jukebox. This jukebox combines those strengths for which NSM is known ... the industry's fastest CD changer and proven electronics ... in a wall jukebox design that offers jukebox operators all the features of a full-sized floor model.

Standard Features

- ◆ A wide view 8-jacket title display (a) that allows patrons to view all 100 selections within 10 seconds. The title display design offers easy loading and uses a standard-sized jacket and title card.
- ◆ The world's most protective CD handling and storage system (b). All CD's are "cradled" in individual trays and are not directly handled, eliminating the possibility of scratching. The compact, snap in/out magazines provide easy loading and transport.
- ◆ The world's fastest 100-CD single player changer (c), visible in the lower area of the jukebox's cabinet, provides more paid-for plays compressed into less time.
- ◆ The jukebox's components (d) are located on an electronics chassis that slides out from the lower cabinet area of the jukebox. The components include a 250-Watt per-channel amplifier, control & credit unit, and internal/external audio source/microphone adapter board.
- ◆ 750-Note capacity bill acceptor and mechanical coin mechanism (e) for U.S.; electronic coin mechanism for Canada.
- ◆ ES 5.1 technology with over 100 programmable features, including "Real Time" clock on/off controller with multiple time windows for attract mode, background music, and more.
