NSM GEMSTAR

NSM's "Shining Star"

The GEMSTAR's design offers an elegant appearance, with a bright, star-lit front glass surrounded by a pewter-colored doorframe. This striking appearance is combined with NSM's strong technical features ... the industry's fastest CD changer and proven electronics ... to make the GEMSTAR an attractive wall mount jukebox that will "shine" in any location.

Standard Features

- ◆ A wide view 8-jacket title display (a) that allows patrons to view all 100 selections within 10 seconds. The title display design offers easy loading and uses a standard-sized jacket and title card.
- ◆ The world's most protective CD handling and storage system. All CD's are "cradled" in individual trays and are not directly handled, eliminating the possibility of scratching. The compact, snap in/out magazines provide easy loading and transport.
- ◆ The world's fastest 100-CD single player changer (b), visible in the lower area of the jukebox's cabinet, provides more paid-for plays compressed into less time.
- ◆ The jukebox's components (c) are located on an electronics chassis that slides out from the lower cabinet area of the jukebox. The components include a 250-Watt per-channel amplifier, control & credit unit, and internal/external audio source/microphone adapter board.
- ◆ 750-Note capacity bill acceptor and mechanical coin mechanism (d) for U.S.; electronic coin mechanism for Canada.
- ◆ ES 5.1 technology with over 100 programmable features, including "Real Time" clock on/off controller with multiple time windows for attract mode, background music, and more.
- ◆ The jukebox's appearance can be altered by installing color lenses over the fluorescent lamps located on the jukebox's inside door. These color lenses—available in red, royal blue, amber, and green—provide an opportunity to tailor the appearance of the jukebox (e) more closely to the location.
